

Within the scope of its activities:

- development and implementation of information systems;
- production of printed circuit boards;
- project and economic consultancy services;
- development and implementation of medical audiovisual engineering

the management of the company Gatema adopted the policy for arrangement of efficient management of the company with the following wording:

Success of the company Gatema is to a significant extent dependent on all-company long-term strategy, business and production processes, products, employees and partners and it is presented by our economic results.

Vision of the Company:

- to become a leader in all and any our activities;
- to offer optimal solutions and provide products and services on global level.

So as to meet the vision of the company and arrange success of the company Gatema, we will continue in improvement and further development of:

- our organization, products, services and processes;
- environmental protection and safety of our employees.

All the employees on all the levels are requested to do so. The requirement is supported by our open and trustful communication.

In development, production and sales of our products we follow requirements towards quality, environment and work safety and we undertake:

- to reach maximal satisfaction of clients, which is a key for reaching business targets and success in the market;
- to increase and develop potential of clients;
- to prefer quality to quantity;
- to profile as a socially responsible company;
- to develop such work conditions so as to get reputation of a fair employer;
- to invest into modernization of technologies on the basis of science and engineering;
- to avoid any injuries and health damages of all and any employees;
- to follow statutory and other stipulations related to the environment, work safety and medical devices;
- to reduce environmental burdens to minimal possible level;
- to treat resources economically;
- to avoid possible emergencies and accidents.
